

Table of Contents – Volume I

Introduction	1
Site, Subsurface, and Anomaly Conditions	2
Results and Discussion	5
Implementation Parameters:	5
Team No. 1:	5
Team No. 2:	7
Team No. 3:	7
Team No. 4:	8
Team No. 6:	8
Team No. 7:	9
Team No. 9:	10
Team No. 10:	10
Method Accuracy and Effectiveness	11
Successful Implementation Parameters	14
Summary and Conclusion	17
References	18
Appendix A–Brief Overview of Geophysical Methods	19
1.0 Seismic Methods	20
1.1 Spectral Analysis of Surface Waves (SASW)	22
1.1.1 Brief Background	22
1.1.2 Instrumentation	22
1.1.3 Data Reduction	23
1.1.4 Limitations, Advantages, and Applications	23
1.1.5 Output and Interpretation	24
1.1.6 Bibliography	24
1.2 Multichannel Analysis of Surface Waves (MASW)	24
1.2.1 Brief Background	24
1.2.2 Instrumentation	25
1.2.3 Data Reduction	26
1.2.4 Limitations, Advantages, and Applications	27
1.2.5 Output and Interpretation	27
1.2.6 Bibliography	28
1.3 Backscatter Analysis of Surface Waves (BASW)	28
1.3.1 Brief Background	28

1.3.2 Bibliography	29
1.4 Seismic Reflection	29
1.4.1 Brief Background	29
1.4.2 Instrumentation	29
1.4.3 Data Reduction	30
1.4.4 Limitations, Advantages, and Applications	30
1.4.5 Output and Interpretation	31
1.4.7 Bibliography	31
1.5 Seismic Refraction	31
1.5.1 Brief Background	31
1.5.2 Instrumentation	33
1.5.3 Data Reduction	34
1.5.4 Limitations, Advantages, and Applications	34
1.5.5 Output and Interpretation	34
1.5.6 Bibliography	35
2.0 Gravitational Methods	37
2.1 Microgravity	37
2.1.1 Brief Background	37
2.1.2 Instrumentation	37
2.1.3 Data Reduction	38
2.1.4 Limitations, Advantages, and Applications	39
2.1.5 Output and Interpretation	39
2.1.6 Bibliography	39
3.0 Magnetic Methods	40
3.1 Magnetometer/Magnetic Gradiometer	40
3.1.1 Brief Background	40
3.1.2 Instrumentation	40
3.1.3 Data Reduction	41
3.1.4 Limitations, Advantages, and Applications	41
3.1.5 Output and Interpretation	42
3.1.6 Bibliography	42
4.0 Electrical Methods	43
4.1 Resistivity Imaging or Electrical Resistivity Imaging (ERI)	43
4.1.1 Brief Background	43
4.1.2 Instrumentation	43
4.1.3 Data Reduction	44

4.1.4	Limitations, Advantages, and Applications	45
4.1.5	Output and Interpretation	45
4.1.6	Bibliography	46
5.0	Electromagnetic Methods	47
5.1	Time-Domain Electromagnetic Induction (TDEM)	47
5.1.1	Brief Background	47
5.1.2	Instrumentation	48
5.1.3	Data Reduction	49
5.1.4	Limitations, Advantages, and Applications	49
5.1.5	Output and Interpretation	50
5.1.6	Bibliography	50
5.2	Frequency-Domain Electromagnetic Induction (FDEM)	51
5.2.1	Brief Background	51
5.2.2	Instrumentation	51
5.2.3	Data Reduction	52
5.2.4	Limitations, Advantages, and Applications	53
5.2.5	Output and Interpretation	53
5.2.7	Bibliography	54
5.3	Ground Probing Radar or Ground Penetrating Radar (GPR)	54
5.3.1	Brief Background	54
5.3.2	Instrumentation	54
5.3.3	Data Reduction	55
5.3.4	Limitations, Advantages, and Applications	56
5.3.5	Output and Interpretation	56
5.3.7	Bibliography	57
Appendix B	– Log of Boring 12BH-102	58
