

## Table of Contents

1	INTRODUCTION AND BACKGROUND.....	6
1.1	Objective of Research.....	6
1.2	Background on Liquefaction Triggering and Mitigation.....	6
1.3	Organization of Report .....	9
2	GROUND IMPROVEMENT VERIFICATION AND VALIDATION.....	11
2.1	The Concepts of Verification and Validation.....	11
2.2	Relation to Quality Control and Quality Assurance .....	12
2.3	Common Verification Means.....	13
2.4	Common In-situ Validation Tests.....	13
3	OVERVIEW OF THE MECHANISMS THAT MITIGATE LIQUEFACTION.....	15
3.1	Densification and Increase in Lateral Effective Confining Stress .....	15
3.2	Prevent Contraction of the Soil Skeleton.....	16
3.3	Rapid Dissipation of Excess Pore Pressure .....	16
3.4	Soil Reinforcement/Shear Stress Redistribution.....	16
4	TECHNIQUES TO MITIGATE LIQUEFACTION.....	18
4.1	Vibrocompaction.....	18
4.1.1	Densification .....	18
4.2	Deep Dynamic Compaction .....	25
4.2.1	Densification .....	25
4.3	Stone Columns .....	33
4.3.1	Densification/Increased Lateral Effective Confining Stress .....	33
4.3.2	Rapid Dissipation of Excess Pore Pressures .....	39
4.3.3	Soil Reinforcement/Shear Stress Redistribution .....	41
4.4	Compaction Grouting.....	45
4.4.1	Densification/Increased Lateral Effective Stress .....	45
4.4.2	Soil Reinforcement/Shear Stress Redistribution .....	52
4.5	Gravel Drains .....	53
4.5.1	Densification .....	54

4.5.2	Rapid Dissipation of Excess Pore Pressure.....	54
4.5.3	Soil Reinforcement/Shear Stress Redistribution.....	63
4.6	Earthquake Drains.....	64
4.6.1	Densification.....	64
4.6.2	Rapid Dissipation of Excess Pore Pressure.....	67
4.7	Jet Grouting.....	75
4.7.1	Soil Reinforcement/Shear Stress Redistribution.....	75
4.8	Deep Soil Mixing.....	83
4.8.1	Soil Reinforcement/Shear Stress Redistribution.....	83
5	SUMMARY AND CONCLUSIONS.....	93
5.1	Summary of Major Findings.....	93
5.2	Recommendations for Future Work.....	94
6	REFERENCES.....	96
