

TABLE OF CONTENTS

SECTION 1 – INTRODUCTION.....	1
SECTION 2 – BACKGROUND	2
2.1 – Introduction.....	2
2.2 – Time Dependence of Negative Skin Friction	3
SECTION 3 – SINGLE PILES.....	7
3.1 – Introduction.....	7
3.1.1 – Neutral Plane.....	7
3.1.2 – Pile Settlement	11
3.2 – Methods of Calculating Downdrag and Drag Loads.....	11
3.2.1 – Endo Method	12
3.2.2 – Poulos Hand Approximation.....	14
3.2.3 – Fellenius Method.....	21
3.2.4 – PILENEG.....	25
3.3 – Advanced Methods	30
3.3.1 – Modifications to Current Methods	30
3.3.2 – Numerical Methods.....	33
3.4 – Detailed Example	34
3.4.1 – Site Information	34
3.4.2 – Endo Method	39
3.4.3 – Poulos Hand Approximation.....	40
3.4.4 – Fellenius Method.....	43
3.4.5 – PILENEG.....	48
3.4.6 – Result Comparison	54

SECTION 4 – PILE GROUPS	57
4.1 – Introduction.....	57
4.2 – Differences Compared to Single Piles	57
4.3 – Methods of Calculating Drag Loads	60
4.3.1 – Rigid Block Method.....	60
4.3.2 – Drag Load Reduction Coefficient	61
SECTION 5 – MODELING GUIDENCE	64
5.1 – Introduction.....	64
5.2 – Pile Geometry	64
5.3 – Elastic Properties	66
5.4 – Skin Friction and Bearing Capacity	70
5.5 – Settlement	71
5.5.1 – Free Field Settlement.....	71
5.5.2 – Equivalent Footing Settlement.....	74
SECTION 6 – DESIGN	78
6.1 – Introduction.....	78
6.2 - Structural Capacity.....	78
6.3 - Settlement	81
6.4 – Pile Treatment Using Bitumen	82
References.....	87
APPENDIX A – DRAGPILE MANUAL	91
A.1 - Getting Started	91
A.2 - DRAGPILE Interface	91
A.3 - Program Specific Methods	94
