

Table of Contents

Table of Contents	1
List of Figures	4
List of Tables	7
Acknowledgements	10
Information for the Reader	10
1. Overview	11
1.1 Brief Overview of Analysis Methods	11
1.2 Consideration of Uncertainty in the Analysis	12
1.3 SEEAM Spreadsheet Calculator Basics	14
1.3.1 Overview Worksheet	14
1.3.2 Input Worksheet	14
1.3.3 Fuel Estimator Worksheet	15
1.3.4 Calculations Worksheet	15
1.3.5 Results Worksheet	15
1.3.6 Monte Carlo Worksheet	15
1.3.7 Material Coefficients Database Worksheet	15
1.3.8 Transportation Tables Worksheet	15
1.3.9 Load Factor Table Worksheet	16
1.3.10 References Worksheet	16
2. Using the SEEAM Spreadsheet Calculator	16
2.1 Setting up a Project Alternative File	16
2.2 Entering Input Information	16
2.2.1 Basic Information	17
2.2.2 Construction Materials Information	17
2.2.3 Construction Materials Transportation	21
2.2.4 Recycled or Reused Construction Materials Information	23
2.2.5 Recycled or Reused Construction Materials Transportation	25
2.2.6 Construction Site Energy (Fuel Consumed)	28
2.2.7 Waste Materials Transportation	32
2.2.8 Other Transportation	35

2.3	Viewing the Results.....	35
2.3.1	Basic Information	36
2.3.2	Overall Totals – Analytically Calculated	36
2.3.3	Overall Totals – Monte Carlo Simulation for n = 1,000 Values	36
3.	Using the SEEAM Results	38
3.1	Comparing Design Alternatives	38
3.1.1	Method 1: Comparison by Taking the Difference Between two Alternatives 39	
3.1.2	Method 2: Nonparametric Statistical Tests.....	40
3.2	Reducing Environmental Impacts for a Ground Improvement Design	41
4.	Case History Example: LPV 111 in New Orleans, LA	41
4.1	Project Overview	41
4.2	LPV 111 Deep Soil Mixing Alternative	42
4.2.1	Deep Soil Mixing Quantities	42
4.2.2	Deep Soil Mixing SEEAM Analysis Results	43
4.3	LPV 111 Prefabricated Vertical Drains Alternative	46
4.3.1	Prefabricated Vertical Drains Quantities	46
4.3.2	Prefabricated Vertical Drains SEEAM Analysis Results	48
4.4	Comparing LPV 111 Alternatives	50
5.	Case History Example: Replacement Bridge in Dupuyer, MT	53
5.1	Project Overview	53
5.2	Geosynthetic Reinforced Soil Integrated Bridge System (GRS-IBS)	54
5.2.1	GRS-IBS Construction Quantities	54
5.2.2	GRS-IBS SEEAM Analysis Results	57
5.3	Pile Supported Reinforced Concrete Bridge Structure	59
5.3.1	Pile Supported Bridge Construction Quantities	59
5.3.2	Pile Supported Bridge SEEAM Results.....	62
5.4	Comparing Alternatives for the Dupuyer Bridge	64
6.	Selecting More Sustainable Geotechnical Alternatives	69
7.	References.....	70
	Appendix A: SEEAM Spreadsheet Calculator Input for Analysis of LPV 111 Alternatives	73

A.1	LPV 111 Deep Soil Mixing SEEAM Spreadsheet Calculator Input	73
A.2	LPV 111 Prefabricated Vertical Drains SEEAM Spreadsheet Calculator Input	77
Appendix B: SEEAM Spreadsheet Calculator Input for Dupuyer Bridge Alternatives		83
B.1	Dupuyer Bridge GRS-IBS SEEAM Spreadsheet Calculator Input	83
B.2	Dupuyer Bridge Pile Supported Reinforced Concrete SEEAM Spreadsheet Calculator Input	89
