

Contents

1.	INTRODUCTION.....	3
2.	OVERVIEW OF GEOLOGY AND ITS IMPORTANCE IN GEOTECHNICAL ENGINEERING	4
1.1	Rock and soil types.....	4
	Sedimentary geology	5
	Igneous geology	8
	Metamorphic geology.....	9
	Residual soils.....	11
1.2	Geologic structures.....	13
	Folds.....	13
	Faults.....	13
3.	GEOLOGY AND LANDSLIDES	16
3.1	Landslides in the Eastern United States	17
3.2	Landslides in the Midwestern United States	20
3.3	Landslides in the Western United States	22
3.4	Summary of the relationship between geology and landslides	25
4.	GEOLOGY INFORMATION SOURCES	26
4.1	Geology lexicons.....	26
4.2	Engineering geology books and papers.....	26
4.3	Professional organizations and websites	27
4.4	Geology maps.....	28
4.5	Air photos.....	28
4.6	Well logs	29
5.	GEOLOGICAL EVALUATION FOR GEOTECHNICAL ENGINEERING PROJECTS	31
5.1	Review regional geology.....	31
5.2	Review previous reports in the area.....	31
5.3	Summarize and interpret available geologic information.....	32
5.4	Plan the geotechnical investigation.....	32
6.	REFERENCES.....	34
