

## Table of Contents

List of Figures.....	ii
List of Tables.....	iv
Workshop Participants .....	1
Acknowledgements .....	1
Introduction .....	3
Purpose of the Workshop.....	5
Themes and Questions for Discussion.....	6
Theme I. The softening process.....	6
Theme II. Measuring or estimating fully softened strength .....	6
Theme III. Use of fully softened strength in stability analyses .....	6
Theme IV. Research needs on fully softened strength.....	7
Schedule and Organization .....	8
Formal Presentations .....	9
Discussions on Theme I – The Softening Process.....	22
Mechanism of softening .....	22
Types of clays for FSS .....	23
Depth and extent of softening .....	24
Theme I Photos.....	25
Discussions on Theme II – Measuring or Estimating Fully Softened Strength .....	26
Apparatuses for measuring FSS .....	26
Preparation of test specimens.....	27
Representation of fully softened shear strength .....	27
Use of correlations .....	27
Theme II Photos.....	28
Discussions on Theme III – Use of Fully Softened Strength in Stability Analyses.....	29
Guidelines for the use of FSS .....	30
Use of curved strength envelopes.....	31
Extent of softening .....	34
Application of fully softened strength to soil around excavations .....	35
Application of fully softened strength to embankments .....	36

Application of fully softened strength to embankment foundations.....	36
Undrained strengths of fully softened clays.....	38
Progressive failure and residual strength .....	38
Use of back analyses .....	38
The reliability perspective.....	39
Theme III Photos.....	40
Discussions on Theme IV – Research Needs on Fully Softened Strength.....	41
Topics worthy of immediate study .....	41
Additional topics .....	42
Organization and funding of proposed research .....	42
Theme IV Photos .....	43
Summary and Conclusions .....	44
Fully Softened Strength Workshop, August 2011.....	46
References Cited .....	48
Appendix A – Curved Shear Strength Envelopes for Fully Softened Shear Strengths and Their Impact on Slope Stability Analyses .....	50
Introduction .....	51
Measured Strength Envelopes .....	51
Equations for Strength Envelope.....	55
Impact on Slope Stability.....	57
Conclusions and Recommendations.....	63
References Cited in Appendix A .....	64
Appendix B – Bibliography .....	65
List of Participants.....	78

## List of Figures

Figure 1 (a) Stress-displacement curves for overconsolidated and fully softened (normally consolidated) test specimens, and (b) overconsolidated peak, fully softened peak and residual strength envelopes.....	4
Figure 2 Swelling and softening of stiff fissured clays adjacent to excavations (from Terzaghi, 1936). .....	9
Figure 3 Relation between cohesion intercept and time between excavation and failure (from Henkel, 1957). .....	10
