

Table of Contents

Abstract.....	ii
Acknowledgements.....	iv
Table of Contents.....	v
List of Figures	ix
Chapter 1: Introduction	1
1.1. Purpose	1
1.1. Objectives.....	1
1.2. Report Organization.....	2
Chapter 2: Background on T-Walls	5
2.1. Description of T-Walls.....	5
2.2. Review of T-Wall Research.....	6
2.3. Summary	10
Chapter 3: Numerical Modeling.....	11
3.1. Numerical Modeling using FLAC	11
3.2. T-Wall Modeling Approach	13
3.3. Modeling Details and Analysis Techniques.....	15
3.4. Summary	20
Chapter 4: Example of Numerical Analysis	22
4.1. Introduction	22
4.2. Problem Description	22
4.3. Modeling Steps	24
4.4. Results.....	36
4.5. Discussion.....	46
Chapter 5: Parametric Study.....	49
5.1. Purpose	49
5.2. Overview and Parameters.....	49
5.3. Results.....	55
5.3.1. Settlement Analysis.....	57
5.3.2. Combined Settlement and Flood Loading Analysis.....	85
5.3.3. Undrained Deformation Analysis.....	121

5.3.4. Combined Undrained Deformation and Flood Loading Analysis.....	133
5.4. Summary and Conclusions.....	149
Chapter 6: Simplified Analysis Procedure.....	152
6.1. Introduction.....	152
6.2. Basis of Procedure.....	152
6.3. Simplified Analysis Procedure Steps.....	154
6.4. Comparison of Simplified Procedure and Numerical Analysis Results.....	159
6.4.1. Two-Pile Systems.....	159
6.4.2. Three-Pile Systems.....	161
6.5. Adjustment of Simplified Procedure Results.....	163
6.5.1. Background.....	163
6.5.2. Recommendations.....	164
6.6. Simplified Analysis of Example Problem.....	168
6.7. Applications and Limitations.....	171
6.8. Discussion.....	172
Chapter 7: Conclusions and Recommendations.....	174
7.1. Summary of Work Completed.....	174
7.2. Key Findings and Recommendations.....	175
7.2.1. Centrifuge Testing and Corresponding Numerical Modeling.....	176
7.2.2. Parametric Study.....	176
7.2.3. Recommendations for T-Wall Analysis.....	181
7.3. Recommendations for Further Studies.....	181
References.....	183
Appendix A: Centrifuge Tests.....	A-1
A.1. Purpose.....	A-1
A.2. General Overview of Testing Details.....	A-1
A.3. Parameter Variations.....	A-6
A.4. Test Durations.....	A-10
A.5. Test Timelines.....	A-12
A.6. Instrumentation Description.....	A-12
A.7. Instrument Locations.....	A-13
A.8. Centrifuge Results.....	A-15

A.8.1. Settlements.....	A-15
A.8.2. Pore Pressures	A-31
A.8.3. Undrained Strengths.....	A-52
A.8.4. Bending Moments	A-57
A.9. Data Needed for Numerical Analyses.....	A-65
A.10. Interpretation of Preconsolidation Pressure and Initial Stress Profiles	A-66
A.10.1. Preconsolidation Pressures	A-67
A.10.2. Initial Stresses	A-72
A.10.3. Comparison of Preconsolidation Pressures and Initial Stresses.....	A-77
A.11. Uncertainties	A-80
A.12. Conclusions.....	A-81
A.13. References	A-81
Appendix B: Numerical Modeling of Centrifuge Tests.....	B-1
B.1. Purpose	B-1
B.2. Overview	B-1
B.3. Numerical Modeling Steps.....	B-3
B.4. Final Model Cross Sections	B-11
B.5. Comparison of Centrifuge and Numerical Model Results	B-14
B.5.1. Settlements.....	B-14
B.5.2. Bending Moments.....	B-23
B.5.3. Discussion	B-41
B.6. Conclusions	B-41
B.7. References	B-41
Appendix C: Laboratory Test Results for Kaolin Clay.....	C-1
C.1. Background	C-1
C.2. Atterberg Limits	C-1
C.3. Incremental Stress Consolidation Tests.....	C-2
C.4. K_0 Consolidated-Undrained (CK_0U) Triaxial Compression Tests	C-3
C.5. Summary	C-17
C.6. References	C-17
Appendix D: Summary Table of Pile Bending Moments and Axial Loads	D-1
Appendix E: Summary Table of T-Wall Movements	E-1

Appendix F: Summary Table of Soil Movements F-1
Appendix G: Summary Plots of Load, Moment, and Soil Movement Distributions G-1
