

## Contents

Presentation No.	Presenter	Title	Page
1	James Evans	ASDSO Survey of State Experiences Regarding Piping with Conduits Through Embankment Dams	11
2	Chuck Redlinger	NPDP Summary of Incidents	21
3	Robin Fell	Embankment Dam Incidents Relating to Piping Associated With Conduits	51
4	Elmo DiBiagio	Instrumentation Possibilities	97
5	Prof. John Duke	Conduit Wall Thickness Survey Techniques	111
6	Chuck Redlinger	Ochoco Dam: Piezometric Fluctuation Case History	121
7	Doug McClelland	Monitoring and Decision Criteria for Failure Response	133
8	Joseph Kubinsky	Corps of Engineers Inspection Practices and Their Effectiveness	151
9	John Cyganiewicz	Low-Cost Video Inspection of Outlet Works	180
10	Jean Lavallee	Limited Access Inspection Techniques	190
11	Dr. Ken Stokoe	Geophysical Inspection Techniques	204
12	George Austin	Kansas Inspection Techniques and Equipment	227
13	Charles Clevenger	Dalewood Shores Dam Conduit Repair	236
14	Thomas Hepler	Willow Creek Conduit Liner	242
15	Bill Irwin	Ishua Creek Site 4 and Pecos Arroyo #1	249
16	Bob Chamlee	Elba Levee Conduit Repair, VAAP Dam Failure, and Grouting to Mitigate Piping at the Savannah River PAR Pond Conduit	253
17	Mike Montgomery	Design of Repairs to Anita Dam	266
18	Tak Yamashita	Clear Lake Dam Piping and Repair	274
19	Patrick Lindsey	Structural Repair of Conduits	285
20	Mike Snyder	Filter Injection Through Rockfill	317
21	Steve Young	Grouting Conduits for Abandonment (Fish Lake Dam)	337
22	Jay Swihart	Past and Ongoing Research on Piping at USBR	351
