

TABLE OF CONTENTS

EXECUTIVE SUMMARY	i
LIST OF FIGURES	v
LIST OF TABLES	vii
ACKNOWLEDGEMENTS	viii
CHAPTER 1 - INTRODUCTION.....	1
CHAPTER 2 - THEORIES FOR ULTIMATE LATERAL CAPACITIES OF ECCENTRICALLY LOADED DRILLED SHAFTS.....	3
2.1 Introduction	3
2.2 Mechanisms of Deformation and Soil Resistance	3
2.3 Broms's (1964a) Theory for Cohesive Soils with $\phi = 0$	5
2.4 Broms's (1964b) Theory for Cohesionless Soils.....	6
2.5 Brinch-Hansen's (1961) Theory for Soils having both Cohesion and Friction.....	8
2.6 Use of Ultimate Load Theories to Compute Bending Moments.....	10
2.7 Summary	11
CHAPTER 3 - FIELD LOAD TESTS.....	16
3.1 Introduction	16
3.2 Test Shaft Construction.....	16
3.3 Loading Equipment	19
3.4 Loading Procedure	24
3.5 Test Results.....	24
3.6 Summary	26
CHAPTER 4 - SOIL PROPERTIES.....	35
4.1 Introduction	35
4.2 Standard Penetration Tests	35
4.3 Summary of SPT Results.....	36
4.4 Classification Tests	45
4.5 Summary of Classification Test Results.....	49

4.6	Triaxial Tests.....	49
4.7	Relationships Between ϕ Values From Triaxial Tests and SPT Blow Counts	62
CHAPTER 5 - COMPARISON OF MEASURED AND CALCULATED ULTIMATE LATERAL LOAD CAPACITIES.....		67
5.1	Introduction	67
5.2	Broms's (1964b) Theory	67
5.3	Brinch-Hansen's (1961) Theory.....	68
5.4	Brinch-Hansen's (1961) Theory with Cohesion Set Equal to Zero	68
5.5	Brinch-Hansen's (1961) Theory Neglecting Soil Resistance in the Top 1.5 Times Shaft Diameter.....	68
5.6	Brinch-Hansen's (1961) Theory, with Calculated Capacities Multiplied by 0.85	68
5.7	Summary	75
CHAPTER 6 - EFFECTS OF ANALYSIS PROCEDURES AND PARAMETER VALUES.....		78
6.1	Introduction	78
6.2	Effect of Theory Used in the Analysis	78
6.3	Effect of Cohesion.....	78
6.4	Effect of Sloping Ground.....	78
6.5	Effect of Ignoring Soil Resistance at the Top of the Shaft	79
6.6	Effect of Soil Friction Angle	79
6.7	Effect of Changing the Factor of Safety	79
CHAPTER 7 - CONCLUSION.....		81
REFERENCES.....		83
APPENDIX A - EQUATIONS FOR K_q AND K_c FACTORS FOR THE BRINCH-HANSEN'S (1961) THEORY		86
A.1	Introduction	86
A.2	Equations for K_q and K_c	86
APPENDIX B - WIND PRESSURES AND WIND LOADS FOR DESIGN OF SOUND BARRIERS.....		88

B.1 Introduction	88
B.2 Wind Pressures.....	88
B.3 Wind Loads.....	89
APPENDIX C - DESIGN OF DRILLED SHAFT SOUND WALL FOUNDATIONS USING THE SPREADSHEET LCAP	93
C.1 Introduction	93
C.2 Input for LCAP	93
C.3 Components of LCAP	94
C.4 Calculations Performed by LCAP	98
C.5 Sloping Ground Conditions	100
C.6 Output from LCAP.....	100

LIST OF FIGURES

Figure 2.1:	Mechanism of Deformation of an Eccentrically Loaded Drilled Shaft.....	4
Figure 2.2:	Broms (1964a) - Assumed Soil Reaction for Cohesive ($\phi = 0$) Material	7
Figure 2.3:	Broms (1964b) - Assumed Soil Reaction for Cohesionless ($c = 0$) Material	9
Figure 2.4:	Brinch-Hansen (1961) - Assumed Soil Reaction	12
Figure 2.5:	Variation of K_c with Depth	13
Figure 2.6:	Variation of K_q with Depth	14
Figure 2.7:	Earth Pressure Distributions at Ultimate Load and One-half of Ultimate Load	15
Figure 3.1:	Arrangement of Test Shafts	17
Figure 3.2:	Cross-Section of Concrete Shaft.....	18
Figure 3.3:	Test Apparatus.....	21
Figure 3.4:	Section View of Test Setup	22
Figure 3.5:	Plan View of Test Setup.....	23
Figure 3.6:	Typical Load Deflection Curve	25
Figure 3.7:	Prices Fork Load Deflection Curves	29
Figure 3.8:	Salem Load Deflection Curves.....	30
Figure 3.9:	Suffolk Load Deflection Curves.....	31
Figure 3.10:	Fairfax County Parkway Load Deflection Curves.....	32
Figure 3.11:	Roberts Road Load Deflection Curves.....	33
Figure 3.12:	Summary of Field Load Tests	34
Figure 4.1:	Site Plan, Prices Fork	37
Figure 4.2:	Site Plan, Salem.....	38
Figure 4.3:	Site Plan, Suffolk.....	39
Figure 4.4:	Site Plan, Fairfax County Parkway.....	40
Figure 4.5:	Site Plan, Roberts Road.....	41

Figure 4.6:	Summary of Atterberg Limits	48
Figure 4.7a:	Prices Fork, Deviator Stress vs. Axial Strain Curves	50
Figure 4.7b:	Prices Fork, Strength Envelope	51
Figure 4.8a:	Salem, Deviator Stress vs. Axial Strain Curves	52
Figure 4.8b:	Salem, Strength Envelope.....	53
Figure 4.9a:	Suffolk, Deviator Stress vs. Axial Strain Curves	54
Figure 4.9b:	Suffolk, Strength Envelope.....	55
Figure 4.10a:	Fairfax County Parkway, Deviator Stress vs. Axial Strain Curves	56
Figure 4.10b:	Fairfax County Parkway, Strength Envelope.....	57
Figure 4.11a:	Roberts Road, Deviator Stress vs. Axial Strain Curves	58
Figure 4.11b:	Roberts Road, Strength Envelope.....	59
Figure 4.12:	Variation of Friction Angle with N_{Field}	64
Figure 4.13:	Variation of Friction Angle with N_1	65
Figure 4.14:	Variation of Friction Angle with $(N_1)_{60}$	66
Figure B.1:	Moments and Loads on Sound Wall Foundations due to Wind.....	91
Figure B.2:	Example Calculation of Wind Load	92
Figure C.1:	Input and Output from LCAP for Sloping Ground Conditions	95
Figure C.2:	Input and Output from LCAP for Level Ground Conditions.....	96
Figure C.3:	Method 2 for Accounting for Sloping Ground Surface.....	102

LIST OF TABLES

Table 3.1:	Average Ultimate Loads from Field Tests	28
Table 4.1:	SPT Blow Count Values and Corrections	42
Table 4.1:	(Continued) SPT Blow Count Values and Corrections.....	43
Table 4.2:	Summary of SPT Results	44
Table 4.3:	Classification Test Results	46
Table 4.3:	(Continued) Classification Test Results.....	47
Table 4.4:	Summary of Specimen Data from Triaxial Tests	60
Table 4.5:	Summary of Triaxial Test Results and Average N-values	61
Table 5.1:	Summary of Soil Properties	69
Table 5.2:	Comparison of Measured and Calculated Ultimate Lateral Capacities for Broms's (1964b) Theory	70
Table 5.3:	Comparison of Measured and Calculated Ultimate Lateral Capacities for Brinch-Hansen's (1961) Theory.....	71
Table 5.4:	Comparison of Measured and Calculated Ultimate Lateral Capacities for Brinch-Hansen's (1961) Theory with Cohesion Set Equal to Zero..	72
Table 5.5:	Comparison of Brinch-Hansen's (1961) Theory and Broms's (1964b) Theory for Differing Friction Angles (Cohesion = 0).....	73
Table 5.6:	Comparison of Measured and Calculated Ultimate Lateral Capacities for Brinch-Hansen's (1961) Theory Neglecting Soil Resistance in the Top 1.5 Times Shaft Diameter	74
Table 5.7:	Comparison of Measured and Calculated Ultimate Lateral Capacities for Brinch-Hansen's (1961) Theory with the Calculated Capacity Multiplied by 0.85	77
Table 6.1:	Summary of Variables Used in the Parametric Study.....	80
Table B.1:	C _c Values for Sound Barriers.....	90
