

## Table of Contents

<b>1. Recycled Materials</b> .....	1-1
1.1 Materials Use in Geoconstruction .....	1-1
1.2 Purpose and Scope .....	1-2
1.3 Material and Site Work Considerations.....	1-4
1.4 Information Sources.....	1-4
1.5 Bibliography .....	1-5
<b>2. Reclaimed Concrete Aggregate</b> .....	2-1
2.1 Introduction .....	2-1
2.2 Summary of Findings .....	2-1
2.3 Laboratory Test Methods .....	2-2
2.3.1 Screening Tests .....	2-3
2.3.2 Laboratory Mechanical and Aggregate Property Tests .....	2-3
2.4 Field Compaction Tests .....	2-5
2.5 Properties of RCA .....	2-6
2.6 Potential Issues and Problems with RCA .....	2-10
2.7 Properties of RCA and Natural Aggregate Blends.....	2-11
2.8 Bibliography .....	2-13
<b>3. Reclaimed Asphalt Pavement</b> .....	3-1
3.1 Introduction .....	3-1
3.2 Summary of Findings .....	3-1
3.3 Laboratory Test Methods .....	3-2
3.3.1 Screening Tests .....	3-3
3.3.2 Laboratory Mechanical and Aggregate Property Tests .....	3-3
3.3.3 Field Tests .....	3-5
3.4 Properties of RAP .....	3-6
3.4.1 Physical and Mechanical Properties.....	3-6
3.5 Environmental Properties and Impacts .....	3-13
3.6 Bibliography .....	3-14

<b>4. Tire Derived Aggregate</b> .....	4-1
4.1 Introduction .....	4-1
4.2 Summary of Findings .....	4-2
4.3 Laboratory Test Methods .....	4-2
4.3.1 Screening Tests .....	4-2
4.3.2 Mechanical and Durability Property Tests .....	4-3
4.3.3 Field Compaction and Compaction Control .....	4-4
4.4 Properties of TDA .....	4-4
4.4.1 Geomechanical Properties .....	4-5
4.4.2 Environmental Properties and Impacts .....	4-11
4.5 Construction Considerations .....	4-12
4.6 Case Histories .....	4-13
4.7 Bibliography .....	4-16
<b>5. Slag</b> .....	5-1
5.1 Iron Blast Furnace Slag .....	5-1
5.1.1 Summary of Findings .....	5-2
5.1.2 Laboratory Test Methods .....	5-2
5.1.3 Properties of Blast Furnace Slag .....	5-2
5.1.4 Environmental Considerations .....	5-4
5.2 Steel Slag .....	5-5
5.2.1 Introduction–Steel Slag .....	5-5
5.2.2 Summary of Findings .....	5-6
5.2.3 Laboratory Test Methods .....	5-6
5.2.4 Properties of Blast Furnace Slag .....	5-7
5.2.5 Environmental Considerations .....	5-11
5.3 Nonferrous Slags .....	5-12
5.3.1 Introduction .....	5-12
5.3.2 Laboratory Test Methods .....	5-12
5.3.3 Properties of Nonferrous Slag .....	5-12
5.3.4 Environmental Considerations .....	5-14
5.4 Bibliography .....	5-14

<b>6. Coal Ash</b> .....	6-1
6.1 Fly Ash .....	6-1
6.1.1 Introduction .....	6-1
6.1.2 Summary of Findings.....	6-2
6.1.3 Laboratory Test Methods.....	6-3
6.1.4 Properties of Coal Fly Ash .....	6-5
6.1.5 Properties of Fly Ash and Soil Blends .....	6-11
6.1.6 General Regulatory Considerations.....	6-13
6.1.7 Environmental Considerations for Geotechnical Uses.....	6-14
6.1.8 Case History of a Fly Ash Embankment.....	6-15
6.2 Coal Bottom Ash and Boiler Slag.....	6-16
6.2.1 Summary of Findings .....	6-16
6.2.2 Laboratory Test Methods .....	6-17
6.2.3 Properties of Coal Bottom Ash .....	6-18
6.2.4 Properties of Bottom Ash Blends .....	6-21
6.2.5 Environmental Considerations for Geotechnical Uses .....	6-21
6.3 Bibliography .....	6-23
<b>7. Foundry Sand</b> .....	7-1
7.1 Introduction .....	7-1
7.2 Summary of Findings.....	7-1
7.3 Laboratory Test Methods.....	7-1
7.4 Properties of WFS.....	7-3
7.4.1 Physical and Chemical Properties.....	7-3
7.4.2 Mechanical Properties .....	7-6
7.5 Environmental Properties.....	7-9
7.6 Bibliography .....	7-10
