

## Table of Contents

List of Figures.....	ii
List of Tables.....	iii
Acknowledgment.....	iv
Section I - Background.....	1
Soil Properties.....	2
Properties of Virginia Soils.....	2
Correlations Between Friction Angle and SPT N Values.....	4
Drilled Shaft Design Using LCAP101.....	4
Display and output.....	8
Data entry.....	8
Calculation.....	8
Printing results.....	8
Methods of Calculation.....	8
Factor of Safety.....	10
Ultimate Strength Moment Capacities.....	10
Structural Factors of Safety.....	16
Estimates of Deflection.....	17
Section II - Design Example.....	19
Vertical Load.....	19
Wind Load, Eccentricity and Moment.....	19
Soil Properties.....	19
Factor of Safety.....	23
LCAP101 Analysis.....	23
Check on Value of $(N_1)_{60}$ Used to Estimate $\phi$ for the LCAP101 Analysis.....	23
Selection of Shaft Diameter.....	23
Appendix A: Calculation of Percentage of Steel Reinforcement, Bar Sizes, Number of Bars, Moment Capacity, and Structural Factor of Safety.....	26
Percent Steel.....	26
ACI Ultimate Strength Moment Capacity.....	27
Structural Factor of Safety.....	27
Appendix B: References.....	36

## List of Figures

Figure 1: Variation of Friction Angle with $N_{\text{field}}$ .....	5
Figure 2: Variation of Friction Angle with $N_1$ .....	6
Figure 3: Variation of Friction Angle with $(N_1)_{60}$ .....	7
Figure 4: LCAP101 Printed Output.....	9
Figure 5: ACI Ultimate Strength Moment Capacities of Drilled Shafts - $f'_c = 3,000$ psi and $f_y = 60,000$ psi.....	14
Figure 6: ACI Ultimate Strength Moment Capacities of Drilled Shafts - $f'_c = 4,000$ psi and $f_y = 60,000$ psi.....	15
Figure 7: Cross-section through Design Example Sound Wall.....	20
Figure 8: LCAP101 Printed Results for Design Example Sound Wall.....	21
Figure 9: Longitudinal Section through Example Sound Wall Site.....	22
Figure 10: Blow Count Corrections and Averaging for Example Sound Wall Design.....	24

### List of Tables

Table 1: Results of Standard Penetration Tests and Laboratory Tests - Drilled Shaft Test Site Soils .....	3
Table 2: Factors of Safety under Consideration by VDOT for Drilled Shaft Foundations for Sound Barrier Walls .....	11
Table 3: ACI Ultimate Strength Moment Capacities of Drilled Shafts .....	13
Table 4: Approximate Ground Line Deflections of 30-inch Diameter Drilled Shaft Sound Wall Foundations when Subjected to Full Wind Load (inches).....	18
Table A1: Coefficients for Percent Steel Formulas.....	28
Table A2: Bar Sizes, Numbers of Bars, and Percentage of Steel.....	29-35
