Blacksburg, VA 24061

TABLE OF CONTENTS

1. INTRODUCTION	9
2. DRAINED STRENGTH ENVELOPES AVAILABLE.....	10
2.1. Common Drained Strength Envelopes.....	10
2.1.1. Peak strength envelope	10
2.1.2. Fully softened or normally consolidated peak strength envelope.....	10
2.1.3. Residual strength envelope	10
2.2. Curvature of the drained strength envelopes.....	11
2.3. Mechanisms causing strength reduction to fully softened conditions.....	15
2.3.1. Fissures	15
2.3.2. Progressive failure	16
2.3.3. Weathering.....	17
2.3.4. Creep.....	18
2.4. Numerical difference between different drained strengths	18
2.5. Critical State Envelope.....	20
2.5.1. Basics of the critical state concept	20
2.5.2. Critical state strength, fully softened strength, and residual strength.....	23
2.5.3. Peak strength and the critical state concept	26
3. DETERMINATION OF STRENGTH ENVELOPES.....	28
3.1. Laboratory Measurement of Drained Strength Parameters.....	28
3.1.1. Peak Strength	28
3.1.2. Fully Softened Strength	29
3.1.2.1. Triaxial Test	29
3.1.2.2. Direct Shear Test.....	29
3.1.2.3. Ring Shear Test.....	30
3.1.3. Residual strength.....	31
3.1.3.1. Repeated Direct Shear Test	31
3.1.3.2. Ring Shear Test.....	32
3.1.4. Critical State Strength.....	32
3.2. Empirical Correlations	34
4. SOURCES OF GUIDANCE FOR DESIGN STRENGTHS	41
4.1. Textbooks.....	41

4.1.1.	Soil Mechanics by Lambe and Whitman (1979) (SI Version)	41
4.1.2.	Soil Mechanics in Engineering Practice by Terzaghi et al. (1996).....	42
4.1.3.	Fundamentals of Soil Behavior by Mitchell and Soga (2005).....	42
4.1.4.	Geotechnical Engineering: Principles and Practices by Coduto (2011)	43
4.1.5.	Craig’s Soil Mechanics by Knappett and Craig (2012).....	43
4.1.6.	An Introduction to Geotechnical Engineering by Holtz et al. (2011).....	44
4.1.7.	Principles of Foundation Engineering by Das and Sivakugan (2019).....	44
4.1.8.	Principles of Geotechnical Engineering by Das and Sobhan (2018).....	44
4.1.9.	Advanced Soil Mechanics by Das (2019).....	44
4.1.10.	Soil Strength and Slope Stability by Duncan et al. (2014)	44
4.1.11.	Critical State Soil Mechanics by Schofield and Wroth (1968).....	44
4.1.12.	Soil Behaviour and Critical State Soil Mechanics by Wood (1999)	45
4.1.13.	Disturbed Soil Properties and Geotechnical Design by Schofield (2005).....	45
4.2.	Federal Government Manuals	45
4.2.1.	FHWA GEC 5 Evaluation of Soil and Rock Properties (FHWA 2002).....	46
4.2.2.	FHWA Soil and Foundations Reference Manual - Volume I (FHWA 2006)	46
4.2.3.	EM 1110-2-1902 – Slope Stability (USACE 2003)	46
4.2.4.	USBR Design Standards for Embankments (USBR 2011)	46
4.2.5.	NAVFAC DM 7.1 - Soil Mechanics (NAVFAC 2021)	47
4.2.6.	NAVFAC DM 7.2 Foundations and Earth Structures (NAVFAC 1986/2022).....	47
4.2.7.	FERC Engineering Guidelines for the Evaluation of Hydropower Projects (FERC 2006)	47
4.2.8.	MSHA Engineering and Design Manual for Coal Refuse Disposal Facilities (MSHA 2010)	47
4.3.	State Departments of Transportation.....	47
4.3.1.	CALTRANS Geotechnical Manual (CALTRANS 2014)	49
4.3.2.	Connecticut DOT Geotechnical Engineering Manual (CTDOT 2020)	49
4.3.3.	Idaho DOT Materials Manual (IDOT 2018).....	49
4.3.4.	Illinois DOT Geotechnical Manual (ILDOT 2015).....	50
4.3.5.	Iowa DOT Design Manual (IADOT 2015).....	50
4.3.6.	Michigan DOT Geotechnical Manual (MDOT 2019)	50
4.3.7.	Montana DOT Geotechnical Manual (MTDOT 2008).....	50
4.3.8.	New York State DOT Geotechnical Design Manual (NYDOT 2014)	50

4.3.9.	Oklahoma DOT Geotechnical Specifications for Roadway Design (OKDOT 2015)	51
4.3.10.	Oregon DOT Geotechnical Design Manual (ORDOT 2018)	51
4.3.11.	Pennsylvania DOT Geotechnical Engineering Manual (PennDOT 2018)	51
4.3.12.	South Carolina DOT Geotechnical Design Manual (SCDOT 2019)	52
4.3.13.	Virginia DOT Geotechnical Design Manual (VDOT 2019)	52
4.3.14.	Washington DOT Geotechnical Design Manual (WADOT 2019)	52
4.3.15.	West Virginia DOT Geotechnical Design Guidance - online	52
4.4.	Local and Municipal Governments Recommendations, Research Reports, and other Publications	53
4.4.1.	Guidance for Potomac Clays	53
4.4.1.1.	Guidelines from Research Papers	53
4.4.1.2.	Local Government Engineering Guidelines	56
4.5.	Summary of Published Guidelines	57
5.	GUIDELINES FOR GEOTECHNICAL PROJECTS	59
5.1	Guidelines for Specific Projects	59
5.1.1.	Excavations in Stiff Fine-Grained Soils	59
5.1.1.1.	Selection of Strength Envelope	59
5.1.1.2.	Other Design Considerations	59
5.1.2.	Embankment Constructed over Slightly Overconsolidated Fine-Grained Soils	60
5.1.2.1.	Selection of Strength Envelope for the Embankment Fill	60
5.1.2.2.	Strength Parameters Selection for Embankment Foundation	60
5.1.2.3.	Other Design Considerations	61
5.1.3.	Stability of Retaining Walls Supporting Fine-grained Soils	61
5.1.3.1.	Selection of Strength Envelope	61
5.1.3.2.	Strength Parameters Selection for Wall Foundation	62
5.1.3.3.	Other Design Considerations	62
5.1.4.	Shallow Foundations on Slopes	62
5.1.5.	Braced Excavations	62
5.2	Use of Cohesion (c or c') in Design	63
6.	ACKNOWLEDGMENTS	67
7.	REFERENCES	68
	APPENDIX A Assessment of Popular Textbooks	81

APPENDIX B Assessment of Federal Government Manuals 83
APPENDIX C Assessment of State DOT Manuals 87
APPENDIX D Assessment of Local Government Manuals for Potomac Clays 105
