

Table of Contents

1.0 Introduction.....	1
1.1 Use and Scope of Report.....	1
1.2 Fundamentals of Geophysics.....	2
1.3 Ambiguity in Geophysical Data	4
1.4 Geophysics Applicability Matrices	6
1.5 Cost and Time Considerations	8
1.5.1 Survey Goal(s).....	8
1.5.2 Number of contractor field personnel	8
1.5.3 Investigation Area and Data Resolution.....	9
1.5.4 Environmental Factors and Time of Year	9
1.5.5 Proximity of Geophysics Contractor to Site (mobilization).....	10
1.5.6 Site Interferences and Conditions.....	10
1.5.7 Level of QA/QC required.....	11
1.5.8 Format of Reported Results.....	11
1.6 Primary Causes of Geophysics Failures	12
1.7 Relative Cost and Time Required for Geophysical Methods.....	12
1.8 Absolute Cost of Geophysics	13
1.9 References	13
2.0 Seismic Refraction Surveys.....	14
2.1 Applications.....	14
2.2 Advantages	14
2.3 Limitations and Potential Interferences.....	14
2.4 How it Works	15
2.4.1 Seismic surveying (reflection and refraction)	15
2.4.2 Seismic refraction surveying	17
2.5 Equipment	19
2.6 Data Acquisition.....	19
2.7 Data Interpretation.....	21
2.8 Seismic Refraction Case Study	23
2.9 References and Applications	29
2.10 Images	29
3.0 High-Resolution Seismic Reflection Surveys	30
3.1 Applications.....	30
3.2 Advantages	30
3.3 Limitations and Potential Interferences.....	30
3.4 How it Works	31
3.4.1 Seismic surveying (reflection and refraction)	31
3.4.2 Seismic reflection surveying	33
3.5 Equipment	34
3.6 Data Acquisition.....	35

3.7 Data Processing and Interpretation.....	37
3.8 Seismic Reflection Case Study.....	39
3.9 References and Applications	49
3.10 Images	50
4.0 Surface Wave Surveys.....	51
4.1 Applications.....	51
4.2 Advantages	51
4.3 Limitations and Potential Interferences.....	51
4.4 How it Works	52
4.5 Equipment	53
4.6 Data Acquisition.....	54
4.7 Data Interpretation.....	55
4.8 MASW Case Study	56
4.9 References and Applications	61
4.10 Images	61
5.0 Resistivity Surveys	62
5.1 Applications.....	62
5.2 Advantages	62
5.3 Limitations and Potential Interferences.....	62
5.4 How it Works	63
5.5 Equipment	65
5.6 Data Acquisition.....	65
5.7 Data Interpretation.....	66
5.8 Resistivity and Self Potential Case Study	68
5.9 References and Applications	69
5.10 Images	69
6.0 Self-Potential Surveys.....	70
6.1 Applications.....	70
6.2 Advantages	70
6.3 Limitations and Potential Interferences.....	70
6.4 How it Works	70
6.5 Equipment	71
6.6 Data Acquisition.....	71
6.7 Data Interpretation.....	72
6.8 Self-Potential and Resistivity Case Study	74
6.9 References and Applications	78
6.10 Images	79
7.0 Electromagnetic (EM) Surveys.....	80
7.1 Applications.....	80
7.2 Advantages	80
7.3 Limitations and Potential Interferences.....	80
7.4 How it Works	80

7.5 Equipment	82
7.6 Data Acquisition.....	83
7.7 Data Interpretation.....	83
7.8 Terrain Conductivity (EM) Case Study.....	84
7.9 References and Applications	87
7.10 Images	87
8.0 Ground-Penetrating Radar (GPR) Surveys.....	88
8.1 Applications.....	88
8.2 Advantages	88
8.3 Limitations and Potential Interferences.....	88
8.4 How it Works	88
8.5 Equipment	90
8.6 Data Acquisition.....	90
8.7 Data Interpretation.....	91
8.8 GPR Example	92
8.9 References and Applications	94
8.10 Images	94
9.0 Micro-Gravity Surveys	95
9.1 Applications.....	95
9.2 Advantages	95
9.3 Limitations and Potential Interferences.....	95
9.4 How it Works	95
9.5 Equipment	97
9.6 Data Acquisition.....	98
9.7 Data Interpretation.....	99
9.8 Micro-gravity Case Study	100
9.9 References and Applications	104
9.10 Images	104
10.0 Borehole Geophysical Surveys.....	105
10.1 Introduction	105
10.2 Acoustic Logs.....	105
10.2.1 Acoustic-velocity logging (sonic logs).....	105
10.2.2 Acoustic wave-form logging	106
10.2.3 Acoustic-televIEWer logging (ATV).....	106
10.3 Electrical Logs.....	106
10.3.1 Spontaneous potential logging (self-potential).....	106
10.3.2 Single-point resistance logging	107
10.3.3 Normal-resistivity logging	107
10.3.4 Focused-resistivity logging (guard logging)	107
10.3.5 Induction logging	107
10.4 Fluid Logs.....	108
10.4.1 Temperature logging	108
10.4.2 Flow logging.....	108

10.5 Radioactive and Nuclear Logs	108
10.5.1 Gamma logs (gamma ray or natural gamma).....	108
10.5.2 Gamma-gamma logging (density log).....	108
10.5.3 Neutron logging.....	109
10.6 Casing and Borehole Integrity Logs.....	109
10.6.1 Caliper logging	109
10.6.2 Casing Logging	109
10.6.3 Borehole-deviation logging.....	110
10.6.4 Cement-bond logging	110
10.7 Cross-hole Seismic	110
10.8 References and Applications	111
11.0 Geophysical Services and Equipment	112
11.1 Geophysical Contractors	112
11.2 Equipment Manufacturers	115
11.3 Software.....	116
11.4 References	117
