

TABLE OF CONTENTS

Acknowledgments	iii
PART A – INTRODUCTION AND BACKGROUND.....	1
Triaxial Test Measurements of Shear Strength	3
Guiding Principles	5
Linear representation	5
Nonlinear representation.....	6
Piecewise representation	7
PART B – PRACTICAL CONSIDERATIONS.....	8
1. LINEAR FUNCTION	9
2. SECANT ϕ' APPROACH.....	10
3. TWO-PARAMETER POWER FUNCTION	12
4. THREE-PARAMETER POWER FUNCTIONS	15
McGuire and VandenBerge (2017).....	15
Jiang et al. (2003).....	16
5. MODIFIED HOEK-BROWN	18
6. USE OF THE ENVELOPE FITTING PROCEDURE (EFP).....	20
General Information	20
Extrapolation.....	21
Instructions for the EFP.....	22
Information about calculation and plotting support tabs.....	24
Sample results	26
Settings in Microsoft Excel®	29
PART C – THEORETICAL CONSIDERATIONS.....	30
7. ENVELOPE FITTING.....	31

Restrictions on parameter values	31
Representation of Stresses	34
Approach to fitting	35
Fitting procedure	37
Linear and power function forms	37
Secant ϕ' approach	42
Modified Hoek-Brown (MHB)	43
8. QUALITY OF FIT	44
9. REFERENCES	48
APPENDIX A – NOTATION.....	52
APPENDIX B – EXAMPLE DATA.....	55
