

## TABLE OF CONTENTS

	Page <u>No.</u>
List of Figures .....	iii
List of Tables .....	iv
List of Symbols .....	v
 INTRODUCTION .....	 1
 SHEET PILE WALLS IN PRACTICE .....	 2
Types of Walls .....	2
Typical Uses and Locations .....	2
Sheet Pile Materials .....	4
Construction Techniques .....	4
 SOIL - STRUCTURE INTERACTION .....	 8
Behavior and Modes of Failure .....	8
Earth Pressure Theories .....	8
Background .....	11
Rankine Theory .....	14
Coulomb Theory .....	16
Log Spiral Theory .....	19
Soil Properties .....	22
Cohesionless Soils .....	22
Cohesive Soils .....	25
Other Loads on Sheet Piles .....	29
 DESIGN OF ANCHORED SHEET PILE RETAINING WALLS .....	 31
General Considerations .....	31
Free Earth Support Method .....	34
Stability of Sheet Pile Walls in Cohesive Soils.....	44
Accuracy of the Free Earth Support Method .....	48
Rowe's Research .....	48
Rowe's Moment Reduction Method .....	52
Other Design Methods .....	57
Tie Rod Design .....	60
Wale Design .....	62
Anchor Design .....	62
Capacity of Deadman .....	65
Location of Deadman .....	69
Corrosion Considerations .....	69

	Page No.
APPENDIX A - COMPUTER PROGRAM : FES .....	72
Program Operation .....	73
System Requirements .....	73
Program Description .....	74
(F1) Introduction and Program Guide .....	74
(F2) Create Data File .....	76
(F3) Review or Edit Data File .....	78
(F4) Calculate .....	79
(F5) Print Results .....	79
(F6) Plot Net Pressure, Shear and Moment Diagrams .....	80
(F7) End Program ... Return to DOS .....	81
Comparison of FES to U.S. Army Corps of Engineers Program CSHTWAL .....	82
Subroutines Used in FES .....	85
Variables Used in FES .....	89
APPENDIX B - EXAMPLE PROBLEMS .....	96
Problem 1 - Granular Soil .....	97
Problem 2 - Cohesive Soil .....	107
Problem 3 - Mixed Layers .....	128
Problem 4 - Continuous Deadman .....	149
Problem 5 - Short Deadman .....	151
APPENDIX C - COMMONLY USED STEEL SHEET PILE SECTIONS .....	154
REFERENCES .....	160

## FIGURES

Figure No.	Description	Page No.
1	Cantilevered and Anchored Sheet Pile Walls .....	3
2	Typical Sheet Piles .....	5
3	Construction Techniques for Sheet Pile Walls .....	7
4	Modes of Failure for Cantilever Walls .....	9
5	Failure Modes for Anchored Walls .....	10
6	Wall Movement Required to Develop Active and Passive Earth Pressures .....	13
7	Rankine Failure Zones .....	15
8	Coulomb Earth Pressures .....	17
9	Comparison of Coulomb and Log Spiral Theories .....	20
10	Log Spiral Active and Passive Earth Pressure Coefficients .....	21
11	Cohesionless Soil Properties .....	24
12	Active and Passive Earth Pressures for Short-Term and Long-Term Conditions in Cohesive Soils .....	26
13	Controlling Dimensions for Anchored Walls .....	32
14	Earth Pressure Distribution for Granular Soil .....	37
15	Net Earth Pressure Distribution for Granular Soil ...	38
16	Earth Pressure Distribution for Cohesive Soil .....	39
17	Net Earth Pressure Distribution for Cohesive Soil ...	40
18	Summation of Moments about Tie Rod Level .....	42
19	Point of Zero Shear and Maximum Moment .....	43
20	Stability of Sheet Pile Walls in Cohesive Soils .....	45
21	Effect of Outside Water on Pile Stability .....	47
22	Effect of Flexure Below Dredge Level .....	50
23	Effect of Flexure Above Dredge Level .....	51
24	Moment Reduction Factors for Granular Soil .....	53
25	Moment Reduction Factors for Cohesive Soil (Short-Term, Undrained Conditions) .....	55
26	Moment Reduction Factors for Cohesive Soil (Long-Term, Drained Conditions) .....	56
27	Fixed Earth Support Method .....	58
28	Danish Rules .....	59
29	Tschebotarioff's Method .....	61
30	Common Arrangement of Wales and Tie Rods .....	63
31	Types of Anchorage .....	64
32	Continuous Deadman .....	66
33	Short Deadman .....	67
34	Ovesen's Method for Anchor Slab Capacity .....	68
35	Location of Anchorage .....	70
C1	Bethlehem Steel Sheet Pile Sections .....	155-156

TABLES

Table No.	Description	Page No.
1	Granular Soil Properties .....	23
2	$\delta/\phi$ Relationships .....	22
3	Values of $\delta$ for Various Interfaces .....	25
4	Cohesive Soil Properties .....	28
5	Average Corrosion Rates for Steel Sheet Piles .....	71
6	Comparison of Computer Programs FES and CSHTWAL ....	83-84
C1	Common Steel Grades for Sheet Piles .....	157
C2	Bethlehem H-Pile Sections .....	158
C3	Mechanical Properties for Steel H-Piles .....	159
