CGPR	i
Introduction and Background	1
1.1 Introduction	1
1.2 Kingston Fossil Plant Failure	5
1.3 Outline	6
Engineering Characterization of CCRs.....	8
2.1 Specific Gravity.....	9
2.2 Consolidation Properties and Volume Stability	11
2.3 Hydraulic Conductivity	21
2.4 Shear Strength.....	26
2.5 Compaction Characteristics	37
Dynamic Properties of CCRs.....	40
3.1 Cyclic Shear Strength Properties of CCRs.....	40
CCR Failure Modes and Monitoring Practices	45
4.1 Surface Impoundments	45
4.2 CCR Landfills.....	50
4.3 Failure Modes	50
Slope Stability of CCRs	52
5.1 Limit Equilibrium and Finite Element Analyses	52
Settlement Calculations for CCRs.....	59
6.1 Test Fill Results	59
6.2 Settlement Calculation by Consolidation Theory.....	60
6.3 Settlement Calculation by D'Appolonia Method	61

6.4	Other Observations	63
Reconstitution Technique for Surface Impounded CCRs		65
7.1	Moist Tamping	65
7.2	Air/Water Pluviation.....	66
7.3	Slurry Deposition Techniques	67
7.4	Slurry Deposition Technique Applied to SI CCRs.....	67
7.5	Analysis of Slurry Deposition Technique with SI CCRs	75
Conclusions.....		86
8.1	Engineering Characterization of CCRs	86
8.2	Dynamic Properties of CCRs	86
8.3	CCR Failure Modes and Monitoring Practices.....	87
8.4	Slope Stability of CCRs.....	87
8.5	Settlement Calculations for CCRs.....	88
8.6	Slurry Deposition Technique Applied to SI CCRs.....	88
8.7	Recommendations for Further Study.....	89
References.....		90
Appendix.....		96
	Sample Preparation and Fabric Analysis Spreadsheets.....	96
