List of Figures	iii
List of Tables	v
Acknowledgments.....	vi
Preface.....	vii
Introduction.....	1
Scope of Report.....	3
1. Physicochemical Processes and Consequences for Geotechnical Systems	3
1.1. Chemical reactions and attendant biological and physical processes	3
1.1.1. Sulfide minerals	5
1.1.2. Sulfate minerals	9
1.1.3. Physical, chemical, and biological weathering	14
1.1.3.1. Physical processes	14
1.1.3.2. Chemical processes.....	15
1.1.3.3. Biological processes	19
1.2. Consequences for geotechnical projects and systems.....	21
1.2.1. Heave and uplift pressures	22
1.2.2. Concrete expansion / degradation.....	22
1.2.3. Steel corrosion	23
1.2.4. Acid production	24
1.2.5. Strength and stability effects.....	25
2. Case Histories	28
2.1. Sulfide-induced heave study.....	28
2.2. Microbially-induced sulfidic heave study.....	29
2.3. Embankment fill study.....	30
2.4. Subgrade study	31
2.5. Stability study.....	31
2.6. Acid drainage study	33
3. Guidelines for Anticipating Problems	34
3.1. Problematic formations and associated identifying clues	34
3.1.1. Shale formations created in a marine or estuarine environment	35
3.1.2. Visual indications of shales created in a marine or estuarine environment	40
3.1.3. Fine-grained rock and soil with significant pyrite content.....	43
3.1.4. Visual indications of pyritic fine-grained rock and soil.....	48
3.1.5. Rocks with recognized potential for acid production from sulfide minerals	53
3.1.6. Visual indications of sulfidic rocks with recognized acid potential.....	53
3.1.7. Rock formations with recognized potential for heave from sulfide minerals	55
3.1.8. Visual indications of sulfidic rocks with recognized heave potential	55
4. Guidelines for Practitioners	57
4.1. Recommended procedures for site evaluation	57
4.1.1. Review of regional and site-specific geologic information	58
4.1.2. Early reconnaissance of the site	60
4.1.3. Grab samples and drilled core samples for testing.....	60
4.1.4. Geophysical testing.....	60

4.1.5. Chemical testing	61
4.1.5.1. Total sulfur test.....	65
4.1.5.2. Sulfur fractionation test	66
4.1.5.3. Sulfide sulfur field method	68
4.1.5.4. Acid-Base Accounting (ABA) test	68
4.1.5.5. Hydrogen peroxide oxidation test.....	70
4.1.5.6. Soluble sulfate test.....	71
4.2. Magnitudes, rates, and parameters governing the effects of pyrite oxidation.....	72
4.2.1. Expected rates and magnitudes of swell pressures resulting from pyritic expansion	73
4.2.2. Time-rate of pyrite oxidation.....	75
4.3. Mitigation options for geotechnical systems	77
5. Conclusion	78
6. Possible Related Research Paths.....	79
References.....	81
Appendices.....	88
A. Mitigation Options.....	A-1
B. Survey of Practitioners.....	B-1
C. Chemical Test Procedures.....	C-1
D. Glossary	D-1
E. Visual Identification of Sulfidic Geomaterials	E-1

List of Figures

Figure 1 - Schematic of (a) “sulfide-induced” and (b) “sulfate-induced” heave	5
Figure 2 - Plot of sulfide sulfur content vs. amount of heave	6
Figure 3 - Pyrite octahedral crystals in organic marine shale	8
Figure 4 - Cubical “fool’s gold” form of pyrite	8
Figure 5 - Pyrite framboids	8
Figure 6 - Anhedral pyrrhotite grains	9
Figure 7 - Effects of pyrite oxidation in New Albany Shale	11
Figure 8 - Fibrous gypsum crystal	12
Figure 9 - Shale platelets forced apart by gypsum growth	13
Figure 10 - Geologic cross-section showing origin and migration of gypsum in soil overlying pyritic bedrock	14
Figure 11 - Comparison of rate constants (k) in relation to pH for Eqs. 1, 2, and 4.....	17
Figure 12 - The chemical alteration of pyrite and calcite into gypsum	18
Figure 13 - Ferrobacillus-Thiobacillus bacteria isolated from weathered shale below a heaved floor	20
Figure 14 - Sulfide-induced heave of library floor and bookshelves at Johnson City Public Library, Johnson City, Tennessee	29
Figure 15 - Aerial photo of nine Questa mine waste rock piles, which span 677 acres, in Questa, New Mexico	32
Figure 16 - One of the mine waste rock piles at the Questa molybdenum mine, Questa, New Mexico	33
Figure 17 - Schematic diagram defining the conditions needed for the formation of metalliferous black shales	36
Figure 18 - Locations of typically pyritic Devonian Shales in North America	38
Figure 19 - Geologic time scale	39
Figure 20 - Marine fossil found in Millboro Shale formation (Devonian age)	41
Figure 21 - Devonian spiriferid (“winged” brachiopod).....	42
Figure 22 - Stringocephalus brachiopod commonly used to identify Middle Devonian strata	42

Figure 23 - SEM photographs of Marcellus Shale formation, Devonian age.....	43
Figure 24 - “Fool’s gold” pyrite crystals	48
Figure 25 - Set of color chips from Munsell Color Chart.....	50
Figure 26 - Munsell hue designations.....	50
Figure 27 - Munsell Rock Color Chart	51
Figure 28 - Corrosion of corrugated steel buried culvert from pyrite oxidation	54
Figure 29 - Concrete degradation resulting from “sulfate attack” and corrosion.....	54
Figure 30 - Floor heave resulting from pyrite oxidation.....	56
Figure 31 - Vertical displacement of floor from pyrite oxidation	56
Figure 32 - Floor heave requires leveling of generators	57
Figure 33 - Results of simulated weathering of Alum shales	63
Figure 34 - Schematic diagrams of oxidation/dissolution zones and fluxes of oxygen and water transporting sulfuric acid	76
Figure E.1 - Reference Chart of Munsell Colors Associated with Sulfidic and Other Types of Geomaterials.....	E-1
Figure E.2 - Flake of pyrite in Millboro Shale.....	E-2
Figure E.3 - Cubical crystalline pyrite, “fool’s gold”.....	E-2
Figure E.4 - Fibrous gypsum crystal.....	E-2
Figure E.5 - Marine fossil in Millboro Shale.....	E-2
Figure E.6 - Effects of pyrite oxidation on New Albany Shale	E-2
Figure E.7 – Outcrop of pyritic, calcareous Sevier Shale at the site of the Johnson City Public Library (TN)	E-2
Figure E.8 - Visible evidence of weathering by pyrite oxidation of exposed face of Millboro Shale	E-2

List of Tables

Table 1 - Volume Increases of the Crystalline Solid Phases of Selected Mineral Transformations	10
Table 2 - Pyrite Oxidation Effects on Various Geotechnical Projects and Systems	21
Table 3 - Published Guidelines for Handling Pyritic Materials.....	25
Table 4 - Simplified Weathering Classification System Relating Geological Description and Engineering Significance.....	26
Table 5 - Examples of Pyritic Shales Created in a Marine or Estuarine Environment....	40
Table 6 - Examples of Fine-Grained Rock and Soil Types with Significant Pyrite Content.....	45
Table 7 – Munsell Color Guidelines for Pyritic Geomaterials	52
Table 8 - Examples of Rocks with Recognized Potential for Acid Production from Sulfide Minerals	53
Table 9 - Examples of Rock Formations with Recognized Potential for Heave from Sulfide Minerals	55
Table 10 - Iron and Sulfate Alterations in Shale Samples Over Time.....	64
Table 11 - Heave Parameters Resulting from Pyrite Oxidation	73
Table 12 - IPPG Rating Classification.....	75
Table A - Mitigation Options and Affected Systems.....	A-1
Table B - Responses to Survey of Practitioners.....	B-4
